

KESHA VA PANDI A S

Aspiring AI Developer

ABOUT ME

Adaptable and results-driven student passionate about creating impactful solutions. Skilled in no-code model training, validation, and deployment, with expertise in Java, C, Python, and front-end development. Excels in problem-solving and analytical thinking, blending technical expertise with creative approaches to deliver outstanding results.

PROJECTS

Hackathon Project
2023 - 2024

HOSTEL MANAGEMENT SYSTEM

The hostel management system automates operations such as gatepass and food token bookings, accommodation, complaint registration, and student information management, and ease for both students and administrators.

Self Project
2023 - 2024

TRANSFORMO DOCS - DOCUMENT MANIPULATION

The document processing module integrates OCR for accurate text extraction, enabling seamless document conversion, merging, splitting, and advanced preprocessing to streamline digital document workflows.

Self Project
2024 - 2025

TEXT TO IMAGE GENERATION

The text-to-image generation system utilizes Stable Diffusion with LCM-LoRA for efficient, localized inference, reducing computation time and resource usage while producing high-quality visual outputs from textual prompts.

INTERNSHIPS

RBG AI
2023 - 2024

OCR Document Preprocessing

AI module for Enhancing cheque images by removing grid lines, symbols, and noise, preserving only meaningful text to improve the accuracy of text extraction processes.

OXYHER
2024 - 2025

E-Commerce Website for Women's Intimate Hygiene Products

OxyHer is a dedicated e-commerce platform offering intimate hygiene products tailored for women. It streamlines product discovery and delivery while focusing on health, comfort, and discreet user experience.

SKILL SET

- Model Training and Deployment
 - Intermediate Java Programming
 - Intermediate C and Python programming
 - Data Structures and Algorithms in Java and C
 - Front End Coding (Html,CSS,Js)
 - Wireframe Creation
 - Problem-Solving and Analytical thinking
-

CERTIFICATIONS

- Foundations of Cyber Security in Coursera offered by Google
 - Mastering Problem solving with C in E box
 - Intermediate Python programming in skillrack
 - Fundamentals of Deep learning from NVIDIA
 - Building Real-Time Video AI Applications from NVIDIA
 - Introduction to Transformer-Based NLP from NVIDIA
-

EDUCATION

Sri Ramakrishna Engineering College	(2022 - 2026)	BTech - ARTIFICIAL INTELLIGENCE AND DATA SCIENCE CGPA : 8.28
SRV Boys Higher Secondary School	(2021 - 2022)	12TH BOARD Percentage : 88.16
Sri Sowdambika Convent Matric Hr. Sec. School	(2019 - 2020)	10TH BOARD Percentage : 86.6
