

# KESHAVA PANDI A S

Aspiring AI Engineer

## PROFESSIONAL SUMMARY

Adaptable and results-driven student passionate about creating impactful solutions. Skilled in no-code model training, validation, and deployment, with expertise in Java, C, Python, and front-end development. Excels in problem-solving and analytical thinking, blending technical expertise with creative approaches to deliver outstanding results.

## PROJECTS

Self Project  
2024 - 2025

### TEXT TO IMAGE GENERATION

- Built an optimized text-to-image generation system using Stable Diffusion
- Integrated LCM-LoRA to reduce inference latency significantly
- Designed system to run efficiently on limited GPU resources
- Focused on performance optimization and memory efficiency

Self Project  
2023 - 2024

### TRANSFORMO DOCS - DOCUMENT PROCESSING PIPELINE

- Developed a modular document processing system with OCR integration
- Implemented preprocessing pipeline (noise removal, filtering, enhancement)
- Designed workflow for document conversion, merging, and splitting
- Structured system for extensibility and scalability

Hackathon Project  
2023 - 2024

### HOSTEL MANAGEMENT SYSTEM

- Built a system to automate hostel workflows (gatepass, complaints, bookings)
- Designed modular components for maintainability and scalability
- Reduced manual effort through workflow automation
- Applied basic system design principles and structured logic

## SKILLSET

- Model Training and Deployment
- Languages : Java, Python and C
- No code conventional ML
- Transformers for speech and vision
- Tools : Git, FastAPI, Flask, OpenCV
- Front-end Coding (HTML, CSS, Js)
- Wireframe Creation
- Problem Solving and Analytical Thinking

## INTERNSHIP EXPERIENCE

### RBG AI

2024 - 2025

### OCR PROCESSING SYSTEM

AI module for Enhancing cheque images by removing grid lines, symbols, and noise, preserving only meaningful text to improve the accuracy of text extraction processes

### OXYHER

2024 - 2025

### E-COMMERCE PLATFORM

OxyHer is a dedicated e-commerce platform offering intimate hygiene products tailored for women. It streamlines product discovery and delivery while focusing on health, comfort, and discreet user experience

### ORANGE AUTOMATION AND AI SOLUTIONS

2025 - 2026

### AI-BASED QUALITY INSPECTION AND DEFECT IDENTIFICATION

Developed an AI-based inspection system that verifies terminal block assemblies by detecting components and matching them with the expected BOM. It also includes a rail measurement module using manual calibration for dimensional checks. All modules were integrated into a single QML-based interface for streamlined quality inspection

---

## CERTIFICATIONS

- Fundamentals of Deep Learning - NVIDIA
- Foundations of Cyber Security - Google
- Building Real-time video AI applications - NVIDIA
- Transformer Based NLP - NVIDIA

---

## EDUCATION

Sri Ramakrishna  
Engineering College

(2022 - 2026)

### BTECH - ARTIFICIAL INTELLIGENCE AND DATA SCIENCE

CGPA : 8.3

Sri Ramakrishna  
Engineering College

(2023 - 2025)

### BTECH - (SPECIALIZATION) INTELLIGENT SYSTEMS

CGPA : 8.75

SRV Boys Higher  
Secondary School

(2021 - 2022)

### 12<sup>TH</sup> STATE BOARD

Percentage : 88.16

Sri Sowdambika  
Convent Matric Hr.  
Sec. School

(2019 - 2020)

### 10<sup>TH</sup> STATE BOARD

Percentage : 86.6
